UHP’s intention is that Honors Contract assignments supplement, and not replace, work required in the original course. Students and instructors are encouraged to be creative in developing a contract topic and final product. Below are some examples of previous UHP students’ contract topics and final products presented to their instructors for evaluation. These are provided to give you some idea of the types of projects students have done in the past. It is up to each student to work with their instructor to come up with the most appropriate topic and final product for the individual situation.

Course: AAS 145A, Black Social and Political Thought  
Contract Title: Black Feminism  
Final Product: 9 page paper on the issue of African-American female social and political thought from the beginning of slavery until the present day.
